

FES90M-P

High Security Electric Strike

The patented FES90M-P motorised high security electric strike is a revolutionary electronic locking solution. With a high pre-load/side load tolerance, and this is an economic security solution.

The strike accepts voltages from 10 to 30 VDC, is pre-drilled for extension lips and has a unique Power To Lock (PTL) / Power To Open (PTO) field interchangeable function.

The Strike consumes current less than 300mA @ 12VDC at full 35kg pre-load only during locking and unlocking action. In the locked or unlocked state (Sleep Mode), the electric strike consumes less than 15mA @ 12VDC.

The FES90M-P provides two forms of monitoring:

1. LSS (Lock Status Sensor)
2. DSS (Door Latch Sensor)

FES90M-P comes with a 10mm strike lip as standard.
