

PRODUCT FEW3000
 EARLY WARNING ELECTROMAGNETIC CABINET LOCK MONITORED

EW3000

PRODUCT DESCRIPTION

The FEW3000 early warning alarm lock is purposely designed to provide security to all types of drug cabinets, refrigerators, lockers, show cases, containers and the like where not only locking but also monitoring of both the locking device (LSS) power on / power off, and door position (DSS), door opened or closed, is of concern.

The FEW3000 is also provided with the unique feature of "Early Warning", in the event that unauthorised attempts are made to open the door the locking device triggers a changeover relay signalling 'unauthorised attempted entry'.

The lock has a holding force of up to 40kg and accepts 12VDC with a current of 0.3amps and has a working temperature of minus 10°C to plus 50°C.

TECHNICAL DETAILS

PART NO.	FEW3000
HOLDING STRENGTH & DURABILITY	Up to 40kg
VOLTAGE/CURRENT	12VDC/300mA
MONITORING	DSS, Door Status, LSS, Lock Status, Early Warning
SIZE	Locking Device L= 107 x W= 37 x D= 25mm Armature Plate L= 80 x W = 25 x D = 9mm

PRODUCT FEATURES

- Working temperature -10° to +50°C
- Full monitoring DSS/LSS
- Early warning feature
- 5 year warranty
- Low power consumption
- Power OFF to Release Door
